

Manufacturing Associate—Manufacturing

Full Time Position

FSLA Status- Exempt

Job Number: 9018

Job Summary:

We are looking for qualified candidates with a bachelor's degree in biochemical/biological engineering or biological sciences with highly relevant skills and bioprocess manufacturing experience. We are specifically interested in individuals with at least 1-3 years of experience in GMP manufacturing. There is a high preference for the candidate to be familiar with disposable technology such as single AKTA skids for protein purification. The candidate will be expected to work on cell culture processes and purification processes for protein manufacturing. These operations include, but are not limited to, solution preparation, single use bioreactors, column chromatography, filtration processes and perfusion technology. They will need to interface with various departments to ensure processes and designs are compatible for new product technology transfer and to establish future process and equipment automation technology. Experience in the preparation and delivery of oral and written presentations as well as participation in the creation/drafting of SOPs and batch records is a plus. Excellent communication skills and the ability to analyze and interpret data, design appropriately controlled experiments independently, and maintain cGMP documentation are a must.

This is a great opportunity to gain valuable experience with an innovative, small Biotech company and build a career in the biopharmaceutical industry. Candidates should feel comfortable working in a high risk/potential high reward environment and able to work overtime and shift work as project needs are determined.

Minimum Qualifications:

- Bachelor's in biochemical/biological engineering or biological sciences is preferred
- Hands on experience in GMP biomanufacturing (1-3 years)
- Excellent time management and proven ability to complete projects on time
- Excellent level of initiative and quest for knowledge
- Must be organized and self-motivated
- Must have excellent communication and writing skills
- Familiarity with Microsoft Office (Word, Excel and PowerPoint etc.)

Benefits:

BioFactura offers a competitive salary with benefits such as:

- Medical, dental, vision
- Health Savings Account
- Retirement plan with company match
- STD/LTD
- Paid vacation leave

About BioFactura

BioFactura develops and commercializes biodefense drugs, novel drugs, and high-value biosimilars (i.e., follow-on biologics or generic biopharmaceuticals) using its patented StableFast™ Biomanufacturing Platform, the optimal choice for bringing these products to market with faster, lower cost, superior-quality manufacture. For over 10 years, BioFactura has been advancing life-saving medicines from the research bench to the patient using its innovative drug development and manufacturing technologies. Current and past programs include biodefense drugs against smallpox and Ebola, novel medicines for cancer, and low-cost/high-quality biosimilars for autoimmune and infectious diseases.
